

**Reduce your business carbon  
emissions with Net Zero training**

To avoid a world level catastrophe, global greenhouse gas emissions must be **slashed in half** by **2030** and reach **Net Zero by 2050**.

Most of us have tried to eradicate disposable plastics and create energy saving options where possible, but **what does it really take to get to Net Zero in your business?**

D&A Business have teamed up with leading Net Zero experts to help businesses understand the implications of impending legislation, requiring them to reduce and report their carbon emissions.

## Why businesses need to act now

From 30th September 2021 if you wish to bid on large government contracts you **MUST** have a Net Zero Carbon Reduction Plan in place.

### This is just the start.

Businesses are also starting to demand a Net Zero Carbon Reduction Plan and, without one in place, will start to reduce your chances of gaining new business.

It is not a question of if but **when** you start implementing your Net Zero Carbon Reduction Plan.

# Course details

## Course overview:

With three levels of courses, individually tailored to businesses of all sizes and sectors, delegates can learn everything from measuring and managing their carbon footprint and motivating cultural change within the workforce to developing a Net Zero Carbon Reduction Plan.

## Level 2 - Leaders

Suitable for: Leaders

The Net Zero Leader training course has been designed to help business leaders to understand what Net Zero is, what it means to their business and how businesses can benefit from a Net Zero strategy.

### What the course covers:

- Climate change: the targets and the challenges
- The business case for Net Zero: Why is it a strategic imperative?
- What are carbon emissions and where are they in your business?
- 15 elements of scope 3
- Strategy development
- Creating targets for carbon reduction
- Embedding strategies
- Engagement strategy
- Lighting up and mobilising supply chains

## Level 1 - Warrior

Suitable for: All Colleagues

The Net Zero Warriors training course has been designed to inform all levels of colleagues about the fundamentals of Net Zero.

### What the course covers:

- Climate change: the targets and the challenges
- The business case for Net Zero: Why is it a strategic imperative?
- What are carbon emissions and where are they in your business?
- How can I make a difference?

## Level 3 - Master

Suitable for: Senior Leaders

These are predominately for larger organisations where more bespoke solutions are required for senior leaders and will often include workshops to work on Net Zero strategy for the business and relevant training required for those key individuals who will be driving the strategy forward.

All courses and modules can be modified and will be bespoke to the needs/requirements of each business. The course duration can be tailored to you, either taking a lighter touch over a longer period, or a more intensive short programme.

Funding is also available through the Flexible Workforce Development Fund.

A photograph of three cyclists riding away from the camera on a paved road that curves through a dense forest. The trees are tall and thin, with some green and some yellowing leaves, suggesting an autumn setting. The road has white lane markings. The cyclists are wearing helmets and cycling gear; the one in the middle is wearing a bright orange jacket.
